Profile

Senior Software Engineer with 7+ years of experience designing, developing, and deploying scalable, cloud-native software solutions. Adept at API development, distributed systems, and enhancing developer workflows. Proven leadership in cross-functional teams, delivering impactful projects, and driving technical excellence in dynamic environments.

Core Skills

| | |
|--------------|--|
| Languages | Rust, TypeScript, JavaScript, Scala, Java, Terraform |
| Frameworks | Node.js, Spring, React, Play Framework |
| Tools | AWS, Docker, Jenkins, PostgreSQL, Redis |
| Architecture | Microservices, REST APIs, Event-Driven Systems |
| DevOps | CI/CD, IaC, Monitoring & Logging |
| Leadership | Agile, Mentorship, Team Collaboration |

Experience

- 2024–Present **Senior Software Engineer**, *Evervault*, Dublin, Ireland
- Spearheaded development of cloud-native applications on AWS using **Rust** for performance-critical components and **TypeScript** for server-side logic.
 - Designed clean, scalable APIs to improve performance and developer usability, integrating seamlessly with third-party services.
 - Automated infrastructure provisioning using **Terraform**, ensuring system scalability and reliability.
 - Guided cross-team collaboration to deliver new product features and enhance developer workflows through innovative tooling.
- 2022–2024 **Senior Software Engineer**, *Apata*, Dublin, Ireland
- Developed next-gen **Authentication and Cardholder Verification Systems** tailored for secure eCommerce transactions.
 - Led migration of the codebase from JavaScript to **TypeScript**, enhancing code maintainability and robustness.
 - Delivered scalable, secure architectures by leveraging **AWS** and optimizing system performance through rigorous testing.
 - Collaborated with cross-functional teams to meet tight deadlines while maintaining technical excellence.
- 2021–2022 **Software Engineer**, *Salesforce*, Dublin, Ireland
- Built interactive **Slack applications** using **TypeScript**, integrating Salesforce services to enhance user workflows.
 - Developed backend services with **Java/Spring**, ensuring system reliability and high performance.
 - Streamlined CI/CD processes with **Jenkins** and **Terraform**, automating deployments and infrastructure provisioning.
 - Provided mentorship and promoted best practices in coding and architecture.
- 2017–2021 **Software Engineer - Distributed Systems**, *Workday*, Dublin, Ireland
- Improved reliability and performance of distributed microservices by reducing latency and downtime.
 - Created onboarding materials for **Scala**, accelerating team productivity and knowledge transfer.
 - Resolved critical production issues while maintaining service-level agreements (SLAs) with minimal disruption.
 - Contributed to architectural planning, shaping scalable and maintainable solutions.
- 2016 **Software Development Intern**, *Qumas/Dassault Systèmes*, Cork, Ireland
- Prototyped solutions for efficient data ingestion and indexing using **Apache Spark** and **Kafka**.
 - Gained hands-on experience in real-time data processing and performance optimization.
 - Developed proof-of-concept systems for handling large-scale data streams with low latency.

Education

- 2013–2017 **Bachelor of Science in Computer Science**, *Munster Technological University*, Cork, Ireland
- Graduated with First-Class Honours, specializing in distributed systems and advanced algorithms.
 - **Final Year Project**: Designed an OCR system for retail betting, streamlining data entry and reducing manual workloads.

Interests

- Tech Explore emerging tools and trends on HackerNews & ProductHunt.
- Sports Fan of football, rugby, MMA, Formula 1, and golf.
- Running Completed Dublin Marathon '22; training for 2025.
